

Project Area Map

Project Overview

The Broadway Streetcar project will extend the Seattle Streetcar system by approximately one half mile north through Capitol Hill's retail core and will include two to three new stops, as shown on the map at left. The project is currently in design and environmental review.

Project Goals

- Connect to the First Hill Streetcar, Sound Transit's Link Light Rail and regional transit system
- Improve access to neighborhoods
- Strengthen the Broadway business district
- Connect to major employment, special event and education centers
- Strengthen connections where people live, work and shop

Project Features

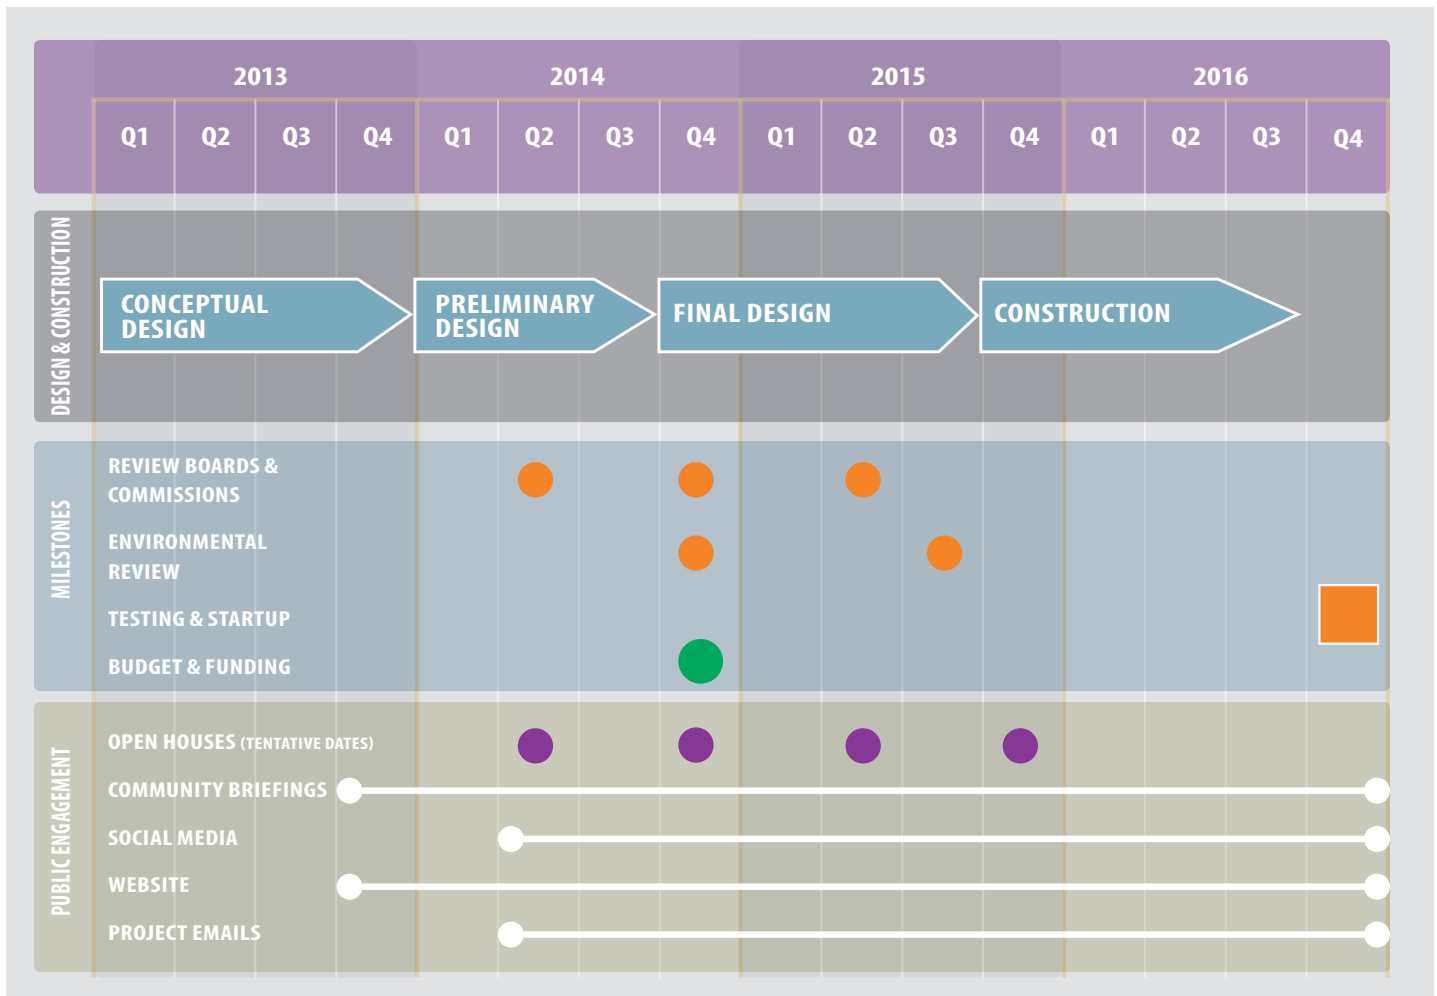

- Serves the commercial core of Broadway
- Adds two or three streetcar stops
- Extends the Broadway protected bicycle lane

Protected Bike Lane on Broadway

A protected bicycle lane will be designed and built as part of the Broadway Streetcar project. We anticipate that it will run from Denny Way north to at least Roy Street. If the project extends north of Roy Street, SDOT will evaluate options for how best to accommodate a bicycle lane north of Roy Street.
