

# SEATTLE STREETCAR

---

## Center City Connector

Thanks for your interest in the Center City Connector Streetcar project! In this email, you'll find updates on our upcoming drop-in session and load zone additions in Pioneer Square.

### **Center City Connector Streetcar construction drop-in**

**Tuesday, September 12, 3:30-6:30 PM – drop in anytime!**

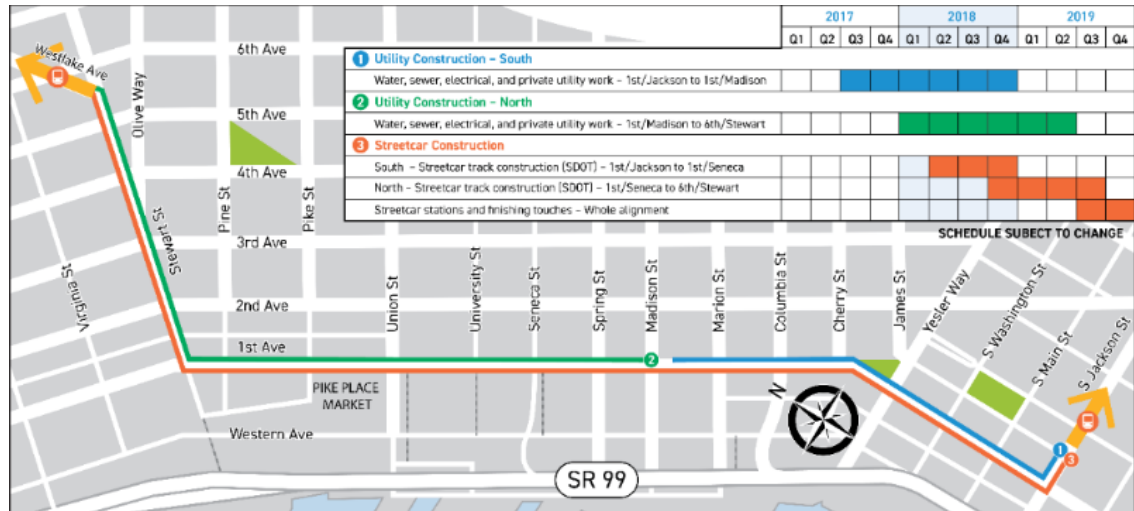

The Ninety, [406 Occidental Ave S](#)

Construction is starting soon in Pioneer Square! Come to our September 12 drop-in session to meet the project team and learn about:

- How this project will link the South Lake Union and First Hill Streetcar lines, creating a system that will connect over a dozen neighborhoods
- Upcoming street closures and parking/load zone changes in Pioneer Square, along 1st Ave between S Jackson and Madison streets
- Planned water shutdowns in the Pioneer Square area to install a new water main, along 1st Ave between S King and Madison streets

We plan to hold additional drop-in sessions as construction progresses north.

Click the map below to see the overall construction timeline.

## Load zone and parking changes

The streetcar will have dedicated lanes on 1st Ave so it can run reliably every 5 minutes at peak times. To allow space for the dedicated lanes – while also balancing other modes like walking, biking, deliveries, and through-traffic – most on-street parking along the route will be removed.

We've been working closely with businesses and residential buildings to replace load zones 1 for 1 within a block of their existing locations.

To ensure new load zones are ready to use prior to construction, we'll add the new load zones in mid- to late September on side streets off 1st Ave.
