

CENTER CITY CONNECTOR STREETCAR

Thank you for your interest in the Center City Connector Streetcar. In this weekly update, you'll find information about utility relocation, planned water shutdowns, parking removal, and ongoing construction.

WHAT'S HAPPENING NOW

- Long-term lane closures on 1st Ave S between S Jackson St and Yesler Way and on S Jackson St between 2nd Ave S and 1st Ave S
- Permanent parking removal along both sides of 1st Ave S between S Jackson St and Yesler Way

What to expect the week of January 15

UTILITY CONSTRUCTION

Crews will continue installing the temporary water main. The temporary water main will run along the curb and connect to buildings on both sides of 1st Ave S between S Jackson St and Yesler Way and on a small section of S Jackson St (see construction map). Expect typical construction impacts such as increased dust, noise, vibration, and truck activity.

PARKING AND LOAD ZONE REMOVAL ON S MAIN ST UNTIL FEBRUARY 7

To connect the temporary water main to the existing main, and to provide clearance from a valve chamber on S Main St, a load zone and a parking spot have been temporarily removed on the south side of S Main St between 1st Ave S and Nord Alley. Once the temporary water main is connected, we'll open the spots back up for use.

Utility construction work on 1st Ave S

FIRST WATER SHUTDOWN IS APPROACHING

Some customers on S Jackson St (between Alaskan Way S and Occidental Ave S) and on 1st Ave S (between S Jackson and S Main streets) can soon expect their first water

shutdown as a part of the project's required utility work. The shutdown is expected to occur sometime between January 27 and February 5 and to last 8 to 10 hours. During this shutdown, Seattle Public Utilities (SPU) crews will connect the temporary water main for that segment to the existing water system.

The SPU outreach team is currently talking to businesses and building managers to determine the least disruptive day and time to turn off the water for the various types of businesses in this area. While the time frame noted above is likely, it is still tentative. Affected customers will receive an official door hanger notification from SPU at least 5 days before the shutdown. The door hanger will include the exact day, time, and length of the shutdown, as well as any steps customers should take to prepare for the water shutdown.

We'll continue to share the latest information on our [webpage](#) and in this weekly email update. You can also check out our [water shutdown FAQs and map](#) for more details about water shutdowns. Information about future water shutdowns will be shared as they are scheduled.

Questions or concerns about this work? Reach us at our 24-hr hotline, (206) 400-7578, or by emailing us at: centercitystreetcar@seattle.gov.

Other work in the area

Puget Sound Energy (PSE) and Seattle City Light (SCL) are also conducting work in the area.

- To learn more about the PSE work, visit: www.pse.com/seattlecore
- To learn more about the SCL work, visit: www.seattle.gov/light/atwork

The Center City Connector will connect the 2 existing streetcar lines to move more people downtown to live, work, shop, and play. For more info or questions about construction, contact us at centercitystreetcar@seattle.gov or our 24/7 hotline, (206) 400-7578.
